Cabling qualifications

You will be aware that we have been bringing our 3667 product up-to-date to create a new Level 2 and Level 3 products that will bear the number 3668. This is being done in conjunction with industry practitioners, major cabling employers and the relevant industry bodies (JIB and FIA)

These are going through the final approval stages before being published and we have been speaking with JIB to ensure that learners completing these qualifications are still able to claim the relevant ECS card to allow them on site to do their work.

Level 3 consultation

The Government continues its drive to review qualifications and their relevance to the market this is predominantly about **England** as usual Digital/ICT is the first into the arena. There are a number of strands to what they are asking to be done, but the main two are:

Do you have something that maps to a Standard? Now seen in England as Occupational Standards.

Do you have products that might gap fill for a T-Levels? Offering breadth and/or depth in a subject that the

We will be looking at these and working to provide clear links between our products and the Standards, as well as how this might affect our Level 2 (possible transition to T-Levels) and Level 4 (HTQ) offer.
